

Risk Management

Professional Development Training from State of Montana IT PMO and ESI International

Project management is opportunity management. It is the ability to seize opportunities, minimize threats and achieve optimum results. Too often, risk management is seen as reactive, or worse, unresponsive. Nothing could be further from the truth. In this course, you'll work through the proactive approach to threat and opportunity—based on a clear understanding of the powerful nature of both qualitative and quantitative approaches to risk management.

You'll end the course with new practices to apply in your environment and new insights on the implications and advantages of applying risk management well.

Course Details:

Location: Mitchell Building, Room 13B
125 N. Roberts
Date: April 5-7, 2010
Time: 8:30 am – 5:00 pm
Length: 3 days
PDUs: 22.5

Government Tuition: \$1,100
Commercial Tuition: \$1,500
